Snow White and the Seven Robots

→ Snow White is a human. Minimum scenes but for context.

→ 7 (or less?) simple robots. Example scenes :

- working underground (busy + the song playing)
- arriving home to see Snow White (confused)
- interacting with snow white (unique characters)

IF there is more time, play the rest of the story

- saving Snow White
- wedding (+1 human character)

Technical Details :

- programming 'work' + emotions (sleepy, grumpy, confused, clever, etc.)

→ 1 robot per person or 1 complex robot (with more emotional expression / etc.) per 2 people

→ 2 groups per 2 scenes (???)

- neopixel
- cardboard
- DC motors
- servos if needed
